SUMMARY

A results-driven Web Developer with over 5 years of experience building, customizing, optimizing, and maintaining 41 web development projects including WordPress, Shopify, e-commerce, e-learning, corporate, and institutional websites. Strong expertise in PHP, JavaScript, HTML, CSS, MySQL, responsive design, SEO-friendly structures, API integrations, and payment gateways, supporting platforms capable of processing 2,000 daily payments. Experienced in maintaining websites, improving performance, fixing bugs, handling security checks, mentoring junior developers, and coordinating workflows through Asana, Slack, Trello, and ClickUp. Seeking to leverage web development and performance optimization expertise to support a growth-focused digital team in building reliable and user-friendly web platforms.

PROFESSIONAL EXPERIENCE

Web Developer – September 2022 - Present

Freelancer

- Developed 15 WordPress and Shopify projects, supporting corporate, e-commerce, e-learning, and retail clients.
- Developed a full Windows-based Node.js POS and café management system, offering features like order taking, gaming station management, inventory, accounting, and reporting through a React frontend backed by a SQLite database.
- Developed a full-stack JavaScript clinic management system (Node.js/Express + React + PostgreSQL via Prisma), covering patient and doctor management, appointment scheduling, medical records, prescriptions, invoicing, department organization, doctor schedules, and WhatsApp-based appointment reminders.
- Developed a fully persistent, cross-device menu website with CMS admin panel (HTML/CSS/Js + Supabase + QR.js). Data lives in Supabase (hosted Postgres), survives browser clears, works on any device.
- Engineered Alyafi IP Group's 25-page corporate website, presenting services via structured navigation clearly.
- Integrated bank, digital wallets, shipping, and Zoom APIs, enabling platforms to process 2,000 daily payments.
- Customized PHP, JavaScript, HTML, and CSS code, delivering tailored features for complex website requirements.
- Produced e-learning platforms with Zoom integrations, course hosting, and custom learner interaction features.
- Structured SEO-focused pages and internal navigation, strengthening brand visibility and online lead generation.
- Retained repeat clients through maintenance, redesigns, updates, and post-launch technical support services.
- Configured payment gateway workflows with banks, supporting secure high-volume transaction handling daily.
- Redesigned outdated client websites, improving responsive layouts, content clarity, and usability across devices.

Web Developer – October 2024 - October 2025

Stro'berry Advertising

- Owned Stro'berry's web development function as the sole developer, delivering 8 tailored client websites.
- Delivered e-commerce and corporate websites for Ejje AE, Don Services, Mets Energy, and The Random House.
- Converted Figma UI and UX designs into pixel-perfect frontend code, achieving responsive website delivery.
- Programmed PHP backend logic and database connections, enabling custom functionality across 8 client builds.
- Implemented on-page SEO, metadata, internal linking, and structured content, boosting search visibility notably.
- Connected Odoo, Aramex, Visual Dolphin, and shipping APIs, improving third-party workflows for businesses.
- Architected MySQL databases for client platforms, improving structured data hosting and reliable operations.
- Tailored websites with templates and from-scratch code, matching each client's branding and functional needs.

Web Developer – February 2024 - April 2025

Digital Revamp

- Completed 6 web development projects for US and UAE clients, supporting growth across various industries.
- Maintained 23 client websites, handling plugins, themes, bug fixes, security checks, and performance updates.
- Optimized website performance through hosting adjustments, plugin updates, and server-side issue resolution.
- Mentored a junior developer in troubleshooting, improving technical problem-solving and delivery confidence.
- Managed MySQL databases for multiple websites, ensuring reliable data hosting and structured backend storage.
- Synchronized development work via Asana and Slack, keeping multi-developer workflows aligned across teams.
- Adapted custom code for every web development project, matching unique requirements across major builds.

Web Developer – December 2022 - February 2024

Smart Guide

- Developed 12 websites across corporate, F&B, real estate, institutional, and learning management projects.
- Coded PHP, JavaScript, HTML, and CSS features, building custom functionality for multi-industry website projects.
- Optimized website performance through hosting adjustments, plugin updates, and server-side issue resolution.
- Managed MySQL databases for multiple websites, ensuring reliable data hosting and structured backend storage.
- Applied responsive designs and SEO-friendly structures, improving usability and search visibility across platforms.
- Created APIs to connect websites with third-party platforms, improving data exchange between systems reliably.
